Office Action Summary	Application No. 10/790,389	Applicant(s) JORKE, HELMUT	
	Examiner Christopher E Mahoney	Art Unit 2851	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/744,634, filed on January 26, 2001.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is a lack of antecedent basis for the dichroic mirrors recited in claims 9 and 10.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee (U.S. Patent No. 5,121,983). Lee teaches a device for projecting a stereo color image upon a screen M including a projection lamp B for emission of a radiation spectrum (col. 5, lines 67-68), a beam splitter F-1 for separation the radiation spectrum emitted from the projection lamp into a first partial light bundle (all colors of lamp in one polarization) and a second partial light bundle (all colors of

Art Unit: 2851

lamp in a second polarization) complimentary to the first part light bundle (the second polarization is complimentary to the first polarization [col. 3, lines 35-40]), first and second color image modulators (H-1, H-2) wherein said first color image modulator (H-1) produces a half image comprised of said first partial light bundle and said second image modulator (H-2) produces a half image comprised of said second partial light bundle, a beam integrator (F-2) provided subsequent to the color image modulators for reuniting the first partial light bundle with the second partial light bundle, and a lens system (K) for output of the therefrom resulting color image. The first partial light bundle and the second partial light bundle are complimentary to one another in polarization. The beam splitter is shown with a splitter mirror and the integrator is shown with an integrator mirror.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lee (U.S. Patent No. 5,121,983) in view of Faris (U.S. Patent No. 5,886,816). Lee teaches the salient features of the claimed invention except for the glasses. Faris teaches in figures 15a and 15 b that it was known to utilize glasses to enable stereoscopic viewing. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the features taught by Faris for the purpose of ensuring that the left and right eyes each only sees the left or right images respectively.

Allowable Subject Matter

Claims 2-3 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
